Detailed Action

Response to Amendment

1. Applicant's arguments filed on 6/23/2005 regarding claims 8-14 have been fully considered. Claims 1-7, 15 have been canceled by the Applicant.
2. Acknowledgement is made of the amended specification regarding the deficiencies of the specification cited in the previous Office Action. The correction is acceptable and the objection to the specification has been withdrawn.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a computer program product to perform the method for emulating a constant delay network over a variable delay network, including the unique steps of: "calculating a second network time stamp representing the relative time that the information in the second network multimedia packet should be rendered by the receiver application in accordance with the common network time base, wherein the calculation includes adding to the first network time stamp, a difference between the second transmitter application time stamp and the first transmitter application time stamp to create a sum that is multiplied by the received frequency of the transmitter application time base."

The closest prior art, Ishibashi (US Patent 6,778,537), discloses a digital broadcast receiving station and a time stamp creating method which enable a correct time stamp to be

always created by adding a time stamp to compensate for the corresponding transmission delay difference to each of transmission packets. However, Ishibashi fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
